

₹10 lakh crore

of Indian bank loans written off in the last decade.

What if the warning signs were visible months earlier?

Financial statements tell you what already happened.
Market signals tell you what is starting to happen.

Financial Statements

- Describe what has already happened
- Published once a year
- Backward-looking

Market Signals

- Reveal what is starting to happen
- Move continuously
- Forward-looking

Foresight AI reads both.

A loan book, scored this morning.

Real FY2026 financials fused with live market signals. Highest risk first.

COMPANY	SECTOR	COMBINED	FINANCIAL	DIGITAL	STATUS
SpiceJet	Airline	86	99	65	Critical
Ola Electric	Electric Vehicles	83	90	74	Critical
Vodafone Idea	Telecom	68	87	41	Elevated Risk
Vedanta	Metals & Mining	36	48	16	Watch
TCS	IT Services	18	1	43	Healthy
Paytm	Fintech	11	10	13	Healthy

Six companies. Six different stories.

The platform discriminates — it does not just flag everything.

SpiceJet

86

CRITICAL

Distress on every axis — the auditor walked out.

Ola Electric

83

CRITICAL

CFO gone, C-suite exodus, 5% of staff cut.

Vodafone Idea

68

ELEVATED RISK

₹34,552cr headline profit hiding negative net worth.

Vedanta

36

WATCH

Levered on paper, but four ratings upgrades in 3 months.

TCS

18

HEALTHY

Pristine books — yet the workforce signal is amber.

Paytm

11

HEALTHY

A genuine recovery: loss to profit, hiring again.

Two things a ratio alone misses.

REPORTED A PROFIT — STILL FLAGGED

Vodafone Idea

"+Rs 34,552 crore profit. Still Elevated Risk."

The profit was one-off other income. Retained earnings sit at -₹1,44,101 crore — the balance sheet is destroyed. A model reading the whole statement is not fooled by a single line.

LEVERED ON PAPER — SIGNALS RISING

Vedanta

"Grey-zone financials. Four upgrades in three months."

Fitch, S&P, CRISIL and ICRA all upgraded; the demerger closed; a top-100 workplace listing. Signals can lead upward. The market is telling you a levered company is being fixed.

Direction matters as much as level.

One platform. Six buyers.

Banks

Loan underwriting

Investors

Portfolio monitoring

PE / VC

Due diligence

Corporates

Supply-chain risk

Auditors

Client risk assessment

CFOs

Self-monitoring

One question, answered every time: should you change your decision today?
